

— Axon Presents

TASERCON

Las Vegas, NV
January 23 – 27 2023

A first-of-its-kind, high-energy, experiential training and educational experience

TASERCON is a first-of-its-kind, high-energy, experiential training and educational experience for law enforcement. At Axon, our mission is to Protect Life – but more importantly, it's to help you do the same. The TASERCON name celebrates where we started as a company with TASER, our life-saving, less-than-lethal technology that changed the game. But we know that saving lives is about so much more than the tools you have on your belt. Depression, burnout and general wellness all directly impact critical decision making, so Axon built this conference to focus on the whole officer – not just on-the-job tools and tactics.

By tapping into core areas of human performance in law enforcement, attendees will be exposed to sessions focusing on:

- More dynamic ways to **PROTECT LIFE**
- Techniques to assist officers in strengthening the human connection between themselves and the communities they serve
- How wellness and vitality influence human performance
- Strategies to reduce officer suicide and support longevity
- Best practices for identifying, recruiting, and retaining talent

These TASERCON sessions are tailored specifically to promote the safety of law enforcement professionals while elevating human performance.

So, if you are interested in learning how to extend pre and post-career longevity by over a decade, you are curious about how burnout negatively impacts critical decision-making in law enforcement, and how to refocus your strategy to recruit and retain talent for your agency, come to TASERCON to learn more!

Unsure what makes TASERCON different than other law enforcement conferences or have questions about why you should attend? Check out the [TASERCON – More Than a Training Opportunity](#) website.
